The Opportunity

Managing global voice termination continues to become more impractical without large carrier-scale volume. In addition, increased competition, eroding margins and the costs of maintaining multiple interconnects make it financially challenging to deliver top quality voice with competitive pricing.

By partnering with IDT and leveraging our economies of scale, you can drive revenue and profitability by focusing on the higher margin growth areas within your business.

Carrier Benefits

With IDT managing your international voice traffic, you can:

- Focus on your core competencies
- Concentrate on delivering higher margin services
- Minimize your dedicated resources and financial risk
- Decrease your research and development costs
- Reduce your infrastructure investment

IDT Competitive Advantages

IDT is uniquely positioned to manage your international voice business, by providing:

- A global network of termination points backed by relationships with over 650 international carrier partners
- Economies of scale that enable market opportunity pricing
- An IP network that delivers enhanced features and functionality and enables numerous financial and operational efficiencies
- A strong global footprint with offices in 19 countries spanning six continents
- Reliable reporting and support systems
